## LOCAL INTEREST LITTLE ITEMS OF

J. W. Baird arrived in town on Friday from New Westminster, B. C. and is looking after his business interests here.

The dining room of the Carbon hotel has been painted and now presents a neat and pleasing appearance.

J. A. MacDonald, Mrs. J. Ramsay, Lucy Ruff and Aaron Balogh went into Calgary on Saturday, returning Sunday evening.

Grades 6 and 7 are writing examinations in the Carbon public school this week.

Mrs. Oliphant, George and Cyril were visitors to the City on Friday, returning Sunday.

H. Holmes was up from Drumheller on Wednesday afternoon.

John Hummel was operated on in the Holy Cross hospital on Saturday and is progressing favorable.

Mrs. Wright and Bert motored into Calgary on Friday, returning Sunday afternoon.

Geo. McNeil was a visitor in Carbon on Monday.

The posters are out for the big

## ROAD CARBON WILL BE REPAIRED

At the Municipal Council meeting held last Monday in the Municipal office, councillors Wright, Neher, Stenberg, Near, Webber and Levins were present.

A delegation from the Village of Carbon, consisting of Messrs. L. Poxon, Greenan and MacDonald, was present and requested on behalf of the citizens of Carbon that the Grainger road and the road south and west of Carbon to the Pole Line be repaired.

When Inspector Graham was here on May 30, he advised the Council that the municipality was to receive a Capital Grant of \$1440 and a Revenue grant of \$850. It was decided to expend the Capital grant on the Grainger road south west of Carbon and the Revenue grant on the road north of Carbon between sec. 22 and 23, twp. 29, range 23.

The mill rate was set at 5 1/2 mills on the dollar on assessed valuation of all rural lands and on buildings and improvements, and the hospital rate was set at 2 1/4 cents per acre on all lands.

Jubilee Celebration and Water Carnival, which will be held this year in Carbon on July 1st.

F. Bessant, W. A. Braisher, V. Hawkins and R. H. Purdy motored to Calgary last Thursday to attend a meeting of the Grand Lodge. They returned on Friday.

Do you know that you can get a suit made to your measure for as low as \$22.50 at Peters—Guaranteed, of course.

Some motorists refer to their machine as 'she', because it's a weaker sex.

The Yukuoka Wireless Receiving Station, claimed to be the largest of its kind in the East, was opened recently. All wireless messages from America and Europe will now be received there. Work on this Japanese station was begun last August costing over \$300,000. The station is equipped with a transmitting apparatus which, however, will not be used except in an emergency.

During the year 1926 a total of \$45,563,000 was spent on construction and maintenance of all provincial highways in Canada, according to computation made by A. W. Campbell, Dominion Highway Commissioner. Of this total \$29,585,000 was spent on construction and \$15,987,000 on maintenance of highways already constructed. The total mileage of roads involved in this aggregate expenditure was 46,824.

Representing fifty Nebraskan families who wish to settle in Canada, a delegation headed by Frank Stewart, of Nort Platte, Nebr., conferred with C. A. Van Scoy, superintendent of the colonization department of the Canadian Pacific Railway Company at Winnipeg in order to obtain details regarding suitable tracts of land. The land seekers will go to Calgary with a representative of the department and inspect land in that vicinity. The group proposing to emigrate has ample capital, it is said.

The Folksong and Handicraft Festival held at the Chateau Frontenac, Quebec, May 20-22, under the auspices of the National Museum of Canada and the Canadian Pacific Railway Company, proved to be perhaps the most outstanding musical event ever held in Canada. Many persons from all parts of the continent gathered at the Ancient Capital to hear the old songs of French Canada and to see the handicraft products that are still produced to a large extent in Quebec despite the modern methods general in almost every other part of the Dominion.

## Money Saving Specials

## -PETERS-

**For Better Quality, Bigger Values, Newest Styles**

The development of the muskrat industry five miles south of Revelstoke will be proceeded with further this year, 160 acres having already been fenced in by the Revelstoke Muskrat Fur Breeders' Association.

Eight hundred families from Switzerland are expected to come out to Western Canada to settle during 1927, according to the Acting Consul for Switzerland. There are thriving Swiss settlements in Notre Dame de Lourdes, Manitoba, and Stettler, Alberta.

Canada's chemical industry recorded an increase of \$7,500,000 in sales during 1926, as compared with the previous year, according to the Dominion Bureau of Statistics. Production by 533 plants was valued at \$120,369,518, as against \$113,000,000 for the previous year.

Ottawa's memorial carillon, to be installed in the new Victory Tower at the Capital, arrived in Canada May 20 on the Canadian Pacific steamship "Balfour." The huge bells, weighing in all about 53 tons, will constitute one of the finest sets in the world. They were cast at the Croydon bell foundry in England.

Word comes from the Engineering Department of the Canadian Pacific Railway that when the Banff Springs Hotel opens on May 15th, for the summer season, the north wing of the building will have been completed and ready for occupancy. Next year at the same date the south wing will have been rebuilt, when there will be at the service of the public an hotel of over 600 rooms and baths, as well as its other splendid accommodations.

## "Sign for Safety"

## The Second Series of Wheat Pool Contracts

**SAFETY** because it is a farmer-owned and controlled co-operative Association which markets over fifty per cent of Canada's wheat crop.

**SAFETY** because it guarantees to the farmers every cent paid by the consumer minus only the minimum costs of marketing.

**SAFETY** because it increased the farmers income and independence by giving him a voice in the selling of his crop.

**SAFETY** because it insures the farmer against the losses and uncertainties caused by fluctuating speculative markets.

**SAFETY** because of low handling costs. The total annual expenses of operating the Alberta Wheat Pool in 1923, 1925 and 1926 was less than one-half a cent per bushel. The total expense of the Central Selling Agency in 1925-26 was one-fifth of a cent per bushel.

**SAFETY** because the Pool employs experts to handle and sell its grain.

**SAFETY** because Pool elevators guarantee fair weights, grades and dockage and good service.

**SAFETY** because the Pool merchandises wheat as the demand arises and thus avoids depressing values by offering more than the consumer will take at fair prices.

**SAFETY** because the sole aim of the Pool salesman is to get the true value of wheat for its members.

After long tests we are convinced **Aluminum** is the best container for tea.

# RED ROSE TEA

"is good tea"

Now packed only in **Aluminum**.

## The Other Fellow's Viewpoint

In this year of Canada's Diamond Jubilee, when the thoughts of its people are being turned backward sixty years and they contemplate the truly marvellous change that has taken place, one great lesson, and the outstanding achievement of Confederation, stands out pre-eminently. A review of the years clearly demonstrates that Canada's material growth and development have been made possible because, to an ever increasing extent as the years have passed, the people of the Dominion have cultivated a spirit of goodwill toward each other.

Confederation had many obstacles to remove, many difficulties to overcome, physical, geographical, financial, but the one problem that had to be solved, and failing which all others could not be surmounted, was to achieve a union of the two races, French and English speaking, to create a feeling of respect and toleration for each other on the part of Roman Catholic and Protestant. To a large extent this has been accomplished, and to it Canada today owes its strength and prosperity.

The citizenship of Canada can render no more fitting or valuable service to their country, can make no greater jubilee contribution to its welfare and progress, than to further develop this spirit of tolerance and goodwill. Only by so doing can peace be maintained and strife eliminated from our midst; only so can effective co-operation be maintained; in the maintenance and development of such relations alone can be found the essentials of a true national spirit.

Studying conditions in other countries, one is happy to note in Canada today an absence of those suspicious, bitter feelings and lack of appreciation of the opinions of others, which appear rather general in other lands. This is not to say there is an entire absence of such antipathies in Canada. They do prevail to some extent, but the better, nobler, loftier aims of mankind are uppermost.

For example, if the Russian people desire a communist form of government, that is their own business and Canada and Britain have no desire to interfere. But Russia should display the same attitude towards other countries, and not try to subvert the citizens of friendly countries from loyalty to their respective governments. The disclosures that Russia is using the diplomatic immunity accorded her representatives by other countries in an endeavor to overthrow their forms of government is revolting to every sense of decency and fairplay.

While deploring some of the methods adopted to promote national feeling in China, one cannot but sympathize with the aspirations of the Chinese people. Foreign rights must be respected in China as in other countries, but there should be no interference in China's right to itself determine its national life and forms of government. One can perhaps better appreciate and sympathize with the Chinese viewpoint if we could visualize Buddhist priests establishing missions throughout Western Canada and opening Sunday schools to teach our children the tenets of the Buddhist religion. Would the Christian churches of Canada acquiesce in this?

To imagine whole sections of Vancouver, Victoria, and other cities set aside as Chinese or Japanese concessions, wherein their laws governed and their trade was supreme. Would Canadians accept such a state of affairs? Rather, do we not even object to individual Chinese and Japanese competing on even terms with our own people?

Reference is made to these rather strong cases, not to pass judgment in regard to them, but to point the moral of this article, viz., that what is needed in the world today is more sympathy and less bitterness; more tolerance and less prejudice; more respect for and less suspicion of each other; more co-operation and less striving at cross purposes.

And what the whole world needs is what Canada ought, in this Jubilee year, dedicate itself to achieve to the fullest degree for our own people and Dominion. Respect for each other's opinions and convictions, recognition of the other fellow's good qualities, a willingness to meet others half way in the solution of community and national problems, a realization that we all are Canadians with a common interest in the Dominion and its welfare and a common duty and responsibility to it to discharge.

## Spends Ninety-Eighth Birthday in Prison

"Lifer" Who Refused Pardon Has Served Twenty-Seven Years

"Old Charlie" Lindwall, the oldest prisoner in Joliet Penitentiary and possibly the oldest in the country, observed his ninety-eighth birthday just as he had observed every milestone since 1900 and he probably will observe every anniversary until he receives the pardon of death.

Lindwall, sentenced to the penitentiary for life in 1900 for murder, which he always denied committing, refused pardon a few

years ago, maintaining he was too old to face the world. At the time he was sentenced the Court told him that his age alone had saved him from the gallows. Since then the Judge and most of the jurors have died, but "Old Charlie" has lived, feeble and bowed with his years, has clung tenaciously to life.

He putters around the prison yard with no guard molesting him and no prisoner intruding upon his dreaming. At chapel services and for the weekly movie "Old Charlie" has a favored seat in the front row.

Mistress, the departing maid who has asked for a reference. "Of course, Mary, I shall have to tell Mrs. Brown of your uncontrollable temper."

Mary "Thank you very much, Miss. I'll make 'em mind to Pa and Q's."

Scrubwoman (relating her adventures to a neighbor). She says to me, "You ain't no lady." So then I says to her, "Two negatives make an affirmative," and busts her one in the snoot, and they carts her off in an ambulance.

## FARMERS!

Minard's is good for colic, strains and colic bolts. Keep a bottle handy.

W. N. 1. 1935

Ease sunburn with Minard's Liniment.

## Plows With Manless Tractor

Spectators Marvel at Machine Used in Test Near Lincoln, Nebraska

A "manless" tractor, controlled by an electric device, plowed a field in Nebraska successfully before a crowd of farmers, professors of agriculture and business men.

Unaided by a human hand, except when the first furrow was plowed to make a guide row, the machine, equipped with an automatic guide invented by F. L. Zibach, of Grand Island, Neb., plowed a 20-acre field on the College of Agriculture farm of the University of Nebraska, near Lincoln.

The tractor runs in an irregular circle, rounding the corners. Except for replenishing the gasoline and oil, it needs no attention. The electric control stops the machine should it leave the furrow, and when the work is completed.

The invention first was tried in 1921, Zibach said. Tiring of riding a plow, he attached his device to his tractor, filled the machine with gasoline and turned it loose.

## Swollen Joints, Quickly Limbered Up Rub On Nerviline

You would be surprised at the wonderful action of "Nerviline" in just such cases. Being thin and not an oil preparation, it is able to penetrate quickly, and down it sings into the tissues, carrying its healing, soothing action wherever it goes. For stopping muscular or nerve pain, for easing a stiff joint, Nerviline is a complete success. Pain, soreness, stiffness all vanish before the magic power of this wonderful liniment. Nearly fifty years of success proves the merit of Nerviline, which is sold everywhere in large 25-cent bottles.

## Ancient Canoe Unearthed

An oak canoe, nine feet long, and estimated to be from four to ten thousand years old, has been unearthed on the south bank of the River Tyne, near Ryton. It is in an excellent state of preservation, and has been placed in the Hancock Museum, Newcastle-on-Tyne.

It Will Relieve a Cold.—Colds are the commonest ailments of mankind and if neglected may lead to serious conditions. Dr. Thomas' Eclectic Oil will relieve the bronchial passages of inflammation speedily and thoroughly and will strengthen them against subsequent attack. And as it eases the inflammation it will usually stop the cough because it allays the irritation in the throat. Try it and prove it.

## Paper Milk Bottles

As a substitute for glass bottles, a London dairy is using containers made of a stout, transparent paper. When they are filled, they are brought together in the form of a cone and sealed with a metal clip. The breakage and loss of glass are saved by this plan, and the paper bottles are easily manufactured and sterilized.

Milber's Worm Powders are the medicine for children who are found suffering from the ravages of worms. They immediately alter the stomachic conditions under which the worms subsist and drive them from the system, and, at the same time, they are tonic in their effect upon the digestive organs, restoring them to health and operation and ensuring immunity from further disorders from such a cause.

Scientists are endeavoring to determine when civilization began. They might also put in a little time determining when it is going to begin again.

## Children Cry For "Castoria"

Especially Prepared for Infants and Children of All Ages

Mother! Fletcher's Castoria has been in use for over 20 years to relieve babies and children of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food, giving natural sleep without opiates.

The genuine bears signature of

Wm. H. Fletcher.

Genuine **ASPIRIN**

Proved safe by millions and prescribed by physicians for

Colds Headache Neuritis Lumbago  
Pain Neuralgia Toothache Rheumatism

**DOES NOT AFFECT THE HEART**

Safe

Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets Also bottles of 24 and 100—Druggists.

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monoacetic-acid-ester of Salicylic acid (Acetyl Salicylic Acid, "A. S. A."). While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

## Aeroplane Service to Mine Field

A regular airplane service between Lac du Bonnet and Long and Rice Lakes is being undertaken this spring by the Western Canada Airways. The trip will be negotiated in 15 minutes, as against three days by canoe. The inauguration of a daily mail service to these mining fields is under consideration by the Government.

## Winnipeg Newspaper Union

A Smart Schooltime Frock

Practical yet decidedly smart is this attractive one-piece frock having the two-piece effect. The box-plaited skirt is joined to the bodice and the sleeves may be long and gathered to narrow wristbands, or short. A becoming round collar finishes the neck and a trim belt fastens with a buckle in front. No. 1604 is in sizes 6, 8, 10 and 12 years. View A, size 8, requires 1 yard 39-inch plain material, and 1 1/2 yards figured. View B, size 8, requires 2 1/2 yards 39-inch, or 2 yards 54-inch plain material, and 1/4 yard 39-inch contrasting. Price 29 cents the pattern.

Home sewing brings nice clothes within the reach of all, and to follow the mode is delightful when it can be done so easily and economically by following the styles pictured in our new Fashion Book. A chart accompanying each pattern shows the material as it appears when cut out. Every detail is explained so that the inexperienced sewer can make with out difficulty an attractive dress. Price of the book 10 cents the copy.

## New Hotel For Moose Jaw

Community Hotel to Serve Well-to-do Tourist Traffic

The Community Hotel in Moose Jaw, now in process of organization, will be five stories in height with a frontage of 75 feet on Main Street and 125 feet on Cordova Street. It will cost around \$250,000. The building has been leased for 29 years by the Associated Canadian Hotels, Limited, Vancouver, who will cater particularly to the increasing well-to-do tourist traffic, making Moose Jaw a stage in its passage to the Rocky Mountains and the Pacific Coast.

## WEAK, LISTLESS GIRLS

Need Such a Tonic as Dr. Williams' Pink Pills to Restore Health

When a girl in her teens becomes pale and sallow, especially if at the same time she shows inclination to the easily, a listlessness and inattention to her work or studies, she needs Dr. Williams' Pink Pills, a tonic which directly and specifically corrects the condition from which she is suffering. A chemical analysis of the blood of such a girl would show it to be deficient in just the elements Dr. Williams' Pink Pills can supply. But an analysis of the blood is not needed; the physical signs are plain. Among these signs are a pallor of the cheeks and lips, dark circles under eyes, easily tired and breathless after slight exertion. Poor appetite, headache, and sometimes fainting spells follow; often the patient is nervous and is startled at the least noise. In all run-down conditions there is no other tonic will build you up so quickly and so surely as Dr. Williams' Pink Pills. The statement of Miss Dorothy Lamblin, Bush Island, N.S., will bring hope to other weak girls. She says: "I wish from my heart I could persuade every person who is in a run-down condition to give Dr. Williams' Pink Pills a trial. About a year ago I was a weak girl, suffering from impoverished blood and a run-down system, with many of the attendant symptoms. I had often read of Dr. Williams' Pink Pills and decided to take them, and after using six boxes I feel as well and strong as ever. Dr. Williams' Pink Pills will be my standby in the future if ever my blood needs building up again, and I shall always find pleasure in recommending them to others."

You can get these pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

It's the most difficult thing in the world to forget what you want to forget.

Write The Borden Co. Limited, Montreal, for Feeding Chart, Baby Welfare Booklet and Best Baby Book. E1921

Borden's EAGLE BRAND

Minard's Liniment is reliable.

**WHEAT POOL DRIVE**

The drive for the sign-up of the Second Series of Wheat Pool contracts is under way and meeting with splendid response. A Wheat Pool rally was held in Calgary previous to the commencement of the campaign. The Pool delegates, members of parliament, representatives of urban centers, and others attended this gathering.

Premier Brownlee predicted success in the drive because of the great improvement in Alberta's prosperity following the formation of the Wheat Pool. Premier Gardiner predicted that those who looked for the Saskatchewan Pool

to fail were in for a serious disappointment. Hon. Mr. Bennett said that the failure of the Alberta Pool to obtain a large sign-up would put agriculture back fifty years in this province.

Teacher: Stubby, do you believe the devil will get us if we are naughty?

Stubby: I don't know, ma'am, but I do know that we'll get the devil if we're caught.

"Sonny," said the doctor, "what shall I bring you, a brother or a sister?"

"If it's all the same to you, doctor, I'd like a pony."

What's the idea of all this talk of dividing the year into thirteen months—don't the rent come due often enough?

Lawyer: Madam, your husband is remarkably well preserved.

Old Lady: Well, he ought to be, he's been stewed for the last thirty years.

Mr. Newlmed: You must be growing tired of me. You never call me "dear" as other men's wives do.

"Do they?" she asked, and heaved a saucer.

It's harder and harder to tell when a girl is on her last lap.

Rastus—Quick Sam, a wildcat jes run into yo' house where yo' wife am.

Sam—Well, he'll jes hab to get out the bes' way he kin—dat's all.

My grandfather lived to be ninety, and never used glasses.

Well, lots of people prefer to drink from bottles.

## What the Red Cross is doing for the Good of Canada

**For the Veteran**

Befriends 3,500 soldiers still in hospital . . . relieves sickness and need in their families . . . cares for the soldier settler . . . provides sheltered employment for the disabled in three Veterans' Workshops.

**For the Children**

Through Junior Red Cross, has aided 5,000 crippled children and has pledged over 137,000 school children to practice health habits and to serve others.

**For the Pioneer**

Brings nursing service to those in frontier districts through 39 Outpost Hospitals and Nursing Stations.

**For the New Canadian**

Welcomes and gives needed attention to immigrant mothers and children at three Seaport Nurseries.

**For the Mothers and Daughters**

In Home Nursing Classes, has taught principles of nursing, diet and home hygiene to over 12,000 women and girls.

**For the Disaster Victim**

Is organized to afford prompt relief to sufferers from fire, flood and epidemic.

## CANADIAN PACIFIC

# Labor costs can be reduced with a Fordson

Of all items entering into the cost of crop production, labor is the one item that can be reduced. And the only effective means of reducing costs to a minimum is the adoption of mechanical power and modern farm machinery.

A Fordson farmer has a greater capacity for work. He can accomplish 2 or 3 times as much as he did before and with greater ease and convenience for himself. This saving in labor makes possible larger acreages, sown under ideal conditions—at just the right time. And, an extra 15 acres of wheat often more than pays for a Fordson.

The Fordson is built and sold to serve mankind. It is significant that over 17,000 are now in use on Canadian farms. Ask us for a copy of our new folder which explains the exclusive mechanical features of the Fordson.

## RUSSIAN TRADE AGREEMENT IS TO BE ABROGATED

Ottawa.—The Government has decided to terminate immediately the trade agreement with Russia. It was announced following a lengthy meeting of the cabinet council.

Premier King, in making the announcement, declared this action had been decided upon after a full discussion of the situation created through the decision of the British Government to sever its relations with Soviet Russia. Evidence in the hands of the Canadian Government made it clear, the Premier said, that certain sections of the agreement between Canada and Russia had been violated by the Russian Government. Premier King pointed out that the agreement was subject to termination unless certain conditions were fulfilled. He specifically quoted a provision agreed to refrain "from hostile action or undertakings against the other and from conducting outside of its own borders any official propaganda direct or indirect against the interests of the British Empire or the Union of Soviet Republics respectively."

Premier Baldwin's statement in the British House of Commons, and evidence before Canadian Government, had made it clear, the Premier said, that this agreement had been violated.

Premier King stated emphatically that termination of trade agreements would not mean discontinuation of trade between Canada and Russia. It would mean that certain quasi-diplomatic privileges enjoyed by the Russian trade commission would be terminated, but every effort would be continued to further trade between Canada and Russia in the same manner in which Canadian trade relations with other nations were conducted.

The Premier said evidence in the hands of the Canadian Government does not disclose any espionage or subversive propaganda so far as the Montreal office of the Russian trade commission is concerned.

## Prize for Pacific Flight

Hawaiian Offers \$25,000 to First aviator Making Non-stop Trip

Honolulu.—The Star Bulletin, in a copyrighted article announces that James D. Dole, president of the Hawaiian Pineapple Company, has offered a purse of \$25,000 to the first aviator and \$10,000 to the second flier to make non-stop flights from the Pacific Coast to Hawaii during the 12 months starting August 15.

New York.—The Bollanca monoplane "Columbia," in which Clarence Chamberlin had hoped to be the first to fly to France, will be entered in the \$25,000 contest announced by James D. Dole in Honolulu. The Fokker monoplane "America," which also was "beaten to the post" in the Paris flight by Charles Lindbergh, may and may not try the Hawaii flight, it was said.

## Future of the Dominion

Ottawa.—"Our grandchildren may even live to see the seat of Empire transferred to our shores," declared Dr. J. H. Coyne, of St. Thomas, Ont., president of the Royal Society of Canada, in discussing the Dominion's future at the society's forty-sixth annual meeting. "The future of our Dominion," he continued, "is on the whole bright with promise."

## Check Fever Epidemic

Montreal.—Preventive measures taken by provincial and municipal officials to check the spread of the present typhoid epidemic are working successfully, health authorities claim. It was predicted that within one month the epidemic would be stamped out.

## Choir of 11,000 Voices

Ottawa.—A choir of 11,000 voices including 1,000 voices selected from 70 churches, irrespective of race or creed, and 10,000 school children, will sing a program of patriotic songs and anthems in connection with the jubilee celebration here. C. J. L. Rickwood, Ottawa, will direct the choir.

## Experiment Was a Failure

New Zealand Lost Heavily in Attempt to Control Price of Butter

Vancouver.—New Zealand's futile attempt to fix the price of butter on the London market and the boycott by London buyers of more than a million boxes, or roughly, 56,000,000 pounds, that were allowed to accumulate in cold storage in Britain in April, have been factors in the shortage of butter supplies in Canada during the past five months.

The action of British merchants in buying butter from Argentina, Australia and Canada, while leaving New Zealand's price-controlled stocks severely alone, withdrew from Canada heavy supplies that normally would have been available for home requirements, it is said here.

As a result, Canadian butter dealers have been scrambling for immediate requirement for months, picking up stray stocks here, there and everywhere, some being brought back from London, some from Quebec, some imported from the United States, and a total of about seven million pounds shipped direct from New Zealand.

The lateness of the season in Canada has also been a factor in the shortage here, spring production being about a month later than usual.

## New York Financier Dies

Payne Whitney, One of America's Richest Men, Victim of Heart Attack

Manhasset, N.Y.—Payne Whitney, financier, philanthropist, sportsman and one of the richest men in the country, died of a heart attack while playing tennis at his country estate, Greentree.

Mr. Whitney was 52 years old. He was the brother of Harry Payne Whitney, son of the late William C. Whitney, secretary of Navy under Cleveland. Estimates of the Whitney estate ranged in Wall Street from \$100,000,000 to \$100,000,000. In 1924 he paid an income tax of more than \$2,000,000, only John D. Rockefeller, Jr., and Henry Ford, paying more.

## Great Interest Being Taken in Eclipse

English Railways Will Run Special Trains to Vantage Points

London.—The eclipse of the sun which will be observed by a portion of England, June 15, is arousing such interest that railway and motor bus companies are preparing to carry thousands of excursionists to the favored belt across England where the view will be best. More than 100 special trains and hundreds of motor buses will carry their passengers to the biggest open air party ever known in England. Most of the participants expect to arrive at vantage points around midnight.

## Postmasters' Convention

Regina, Sask.—T. P. Murphy, Ottawa, superintendent of the equipment and supply branch of the federal post office department, will represent the postmaster-general at the forthcoming convention of the Saskatchewan Postmasters' association to be held in Regina, Tuesday, Wednesday and Thursday, June 7, 8 and 9. About 150 delegates are expected to be in attendance.

## Cable Bill Passed

London.—The House of Lords has given third reading to the Pacific Cable bill, which has now passed both Houses. The bill authorizes reorganization of the Pacific Cable Board in accordance with the settlement of Canada's dispute with that body reached at the last Imperial conference.

## Arms Parley in June

Washington.—The three-power naval limitations conference called by President Coolidge will convene in Geneva on the afternoon of June 20. Secretary of State Kellogg informed the British and Japanese ambassadors after informal conversations had shown the date acceptable to all.

## Radio Typewriter

Rome.—A typewriter capable of receiving radio-phonetic communications at great distances is to be tested between Rome and New York shortly. The machine functions automatically, typing on ordinary paper, guided by radio waves.

## WOULD DEVELOP CANADIAN TRADE WITH BRITAIN

London.—"I am here to visit Canadian trade commissioners in Britain and on the continent and to acquaint myself more fully with the possibilities the markets here offer for Canadian products," Hon. James Macleod, Canadian minister of trade and commerce, told newspapermen in an interview. He added that he was more particularly desirous of increasing inter-empire trade, of which he had been a constant advocate.

The minister mentioned the grant of \$100,000 made by the Canadian government for advertising Canadian goods in Britain. To secure the best means of applying the money was an important object of his visit, he said.

Mr. Macleod acknowledged that the figures of Canadian trade with Britain lately had shown a decrease, through the lessened ability of Britain to purchase Canadian products, although Canadian purchases from Britain showed a slight increase. He believed adequate publicity would soon help to correct the balance. There was always, he said, some unreliability about statistics and they did not invariably show the exact position of trade between two countries like Canada and Britain.

## Trade With U.S.

Canada Regarded by U.S. as Best Outside Field for Investment

Detroit, Mich.—Business of the United States made an eloquent gesture of admiration for its neighbor to the north when the National Foreign Trade Convention turned over an entire session to Canada and Canadians.

Speakers with only one exception were Canadians. They spoke of their great commerce in hard wheat and pulpwood, of their other export trade and of the growing interest of Americans in Canada as attested by their investment of \$3,600,000,000 within the Dominion. Sixty per cent. of all foreign investments in Canada came from the United States, the convention was told by Case R. Howard of the Canadian Bank of Commerce, New York.

"We take it as a compliment," he added, "that Canada is regarded in the United States as the best outside field of investment, and we interpret it as an indication of the estimate placed by the United States upon the character and ability of Canadians."

## Agree on Claims

Washington.—The British and United States governments have agreed on a settlement of mutual claims and those of individuals against both governments for seizure of the settlement are being withheld, pending an arrangement for publication of final notes ratifying the pact. The claims grew out of detention and search during the war on shipping of both countries suspected of carrying war supplies to the enemy.

## Would Send Boys to Canada

Isle of Man Has Scheme for Community Settlement in Dominion

Montreal, Canada is the country to which the Isle of Man is looking for the settlement of her youth, said J. B. Crookall, J.P., mayor of Douglas and member of the House of Keys, who reached Montreal on the White Star liner Doris. Every year the Isle of Man has about 100 boys leaving school at the age of 14. A proposal is afoot to raise the leaving age to 15, following which the island authorities would give them a course of training for one year to fit them for emigration. Mayor Crookall hoped that Manxmen in Canada would interest themselves in this project.

The mayor outlined a scheme he had for the community settlement of Manxmen in Canada. He proposed to send out 100 families if the Dominion Government would set aside a tract of land sufficient to provide for them, making the terms as easy as possible. About 80 per cent. of these families would be agricultural.

## Building New Telegraph Line

Work Will Commence at Once in Northern Saskatchewan District

North Battleford.—Construction is to proceed on a telegraph line between Loon Lake and Meadow Lake. The distance is 55 to 60 miles. The line will serve to link up the Meadow Lake country with the splendid farming sections farther west. It will be a means of communication for these northern people with the outside world, something they have not at present. On representation being made to the department by the Federal member an appropriation of \$8,000 was put through Parliament for the building of the line. The government is ready to act at once on the building of the line. The offices to be established on the line will be settled just as soon as possible.

## The Favored Country

British Labor Leader Says Emigrants' Opportunities in Canada Best in World

London.—Canada contains greater possibilities than any other country in the world provided the right kind of immigration is regulated so as not to displace the existing workers, in the opinion of C. T. Cramp, general secretary of the National Union of Railwaymen, who has just returned from a tour of the Dominion.

Mr. Cramp was struck by the "revolt of Canadian organized labor against the domination of American unions," and the similar movement among professional associations. Canada's railways also came in for eulogistic reference from Mr. Cramp.

## Will Compete in Prize Swim

Montreal, Ernest Vierkötter, Germany's foremost swimmer and conqueror of the English Channel, has arrived in Montreal. He will participate in the Lake George swim for a prize of \$10,000 and later go to Toronto, where he will take part in the \$50,000 race to be held in Lake Ontario off the Queen City during the summer.

## WILL OBSERVE LUNAR ECLIPSE IN FAR NORTH

New York, N.Y.—The purposes of civilization in the Canadian Arctic wilderness have been asked by radio to aid the Harvard University Observatory in observing on June 15 the first lunar eclipse since 1892. Observers in the northern country in the region of Chesterfield Inlet, Bear Lake, Rampart House and Good Hope had a message of instruction broadcast to them recently.

Directions for the observation of this rare lunar phenomenon, addressed to members of the Royal Canadian Mounted Police, representatives of the Hudson's Bay Company and Revillon Freres Trading Company, and the Oblate missionary fathers among the Eskimos, was broadcast in part as follows:

"A total eclipse of the moon will occur on June 15, 1927, the centre of the eclipse being at 2:24 a.m. Eastern Standard Time. The sun and moon will both be nearly on the horizon on the day and hour mentioned, at the points to which this message is addressed.

"It is of great scientific interest to know as exactly as possible what the weather conditions are at that particular time at points near this line. Baker Lake is the most important point of all and the astronomers would appreciate any special efforts to procure observations there."

According to Dr. Wilbur J. Fisher, of Harvard, it should be possible this year to determine the density of the earth's shadow very near to the edge of the earth.

## Investigating Plan to Use Sulphite Wastage

Scientists See Possibility of Making Substitute for Gasoline

Ottawa.—Canadian scientists are investigating the possibility of the manufacture of a substitute for gasoline out of the wastage in the numerous sulphite mills throughout the Dominion, it was revealed at a meeting of the associate committee of physics and engineering of the National Research Council of Canada here.

The sulphite mills, it was declared, in the manufacture of pulp for newsprint are wasting at the same time tremendous quantities of liquor which is a potential source of alcohol. Properly designed motors have been found to operate efficiently on a mixture of alcohol and benzine.

The committee also recommended today that the national research council investigate steps to secure detailed information on the measurement of the ultraviolet rays given off by the sun. If it can be shown that great benefit is to be obtained from these rays then, it is recommended, that special glass should be put over all used in Canadian homes and other buildings. The health giving ultraviolet rays do not, to any great extent, pass through ordinary window glass.

## Ferguson Willing to Co Operate

Toronto.—Premier Ferguson states that he would cooperate with the Alberta Trade Commission in the proposal laid before the Ontario Government by a delegation from Alberta that a national committee be organized to promote inter-provincial trade, with special emphasis on the use of Alberta coal in the Eastern provinces.

## Hon. R. Lemieux Honored

Rome.—Reception and luncheon in honor of Hon. Rodolphe Lemieux, speaker of the Canadian House of Commons, and Madame Lemieux, given by the British ambassador in Italy, Rigid Han, Sir Roland Graham, was attended by several English and Canadian visitors in addition to a distinguished gathering of residents of the capital.

## Plane Service for Mines

Winnipeg.—An aeroplane passenger and freight service to the central Manitoba mine area was inaugurated on June 1. It marks the first commercial air service to operate in the province. Western Airways confined its operations last year to the Red Lake district of Northern Ontario.

## Ox-Tongue Falls, Lake of Bays

Throughout the Lake of Bays region of the Highlands of Ontario, which the members of the Canadian Weekly Newspapers Association will visit when holding their 1927 convention at Bigwin Inn, there are many delightful waterfalls of which Ox-Tongue Falls shown above is one. Canadian National Railway photograph.

## United and Intelligent Action Will Be Needed To Stem Westward Migration of Rat

The press reports recently that a number of rats had been killed by farmers in Saskatchewan, sharply draws attention to two very interesting facts from an agricultural point of view, namely, that the Canadian west is one of the few agricultural areas in the world that is not overrun by these pests and secondly that no time should be lost for every farmer in the prairie provinces to take up this challenge by immediate and no uncertain precautionary action. The truth may as well be faced, says the Natural Resources Intelligence Service of the Department of the Interior, namely, that the brown rat, native of China and scourge of all Europe, is seeking to add one more province of Canada to his habitat. Ever and anon he continues his westward march and it will require the most united and intelligent warfare to stem his migration.

There are two aspects to the threatened rat plague. First, he is a dread carrier of disease, particularly of the bubonic plague or "Black Death" and history tells us that in the fourteenth century some twenty-five million people died in Europe of this dread disease. Nor will it be forgotten that in 1907 there was an epidemic of the plague in India and 2,000,000 deaths are stated to have occurred. Second, there is the economic aspect. What does it cost to feed a rat? Enquiries were carried out in Europe in 1907 and the average annual loss caused by each rat in Great Britain was placed at \$1.80, in France \$1, and in Denmark, \$1.20. Like everything else, there is little doubt that the high cost of rats has since gone up.

The genus *Mus* includes some 150 species of rats and mice but it is the common brown rat which has staged one of the greatest of all natural migrations, animal or human. His native country appears to have been in Western China and he has been fought in scores of countries, but still he moves onward conquering new territory. And it is little wonder that he has won in countless conflicts when one considers his prolific habits of breeding. Brown rats begin to breed at three or four months of age, they have from six to ten litters per year averaging ten each. A pair of rats breeding uninterruptedly for three years without any deaths to their progeny would result in that time in a colony of over 350 million rats.

Mice are bad enough, but the brown rat is infinitely worse and one can conjecture the toll he will take if he becomes firmly established in the greatest granary of the British Empire. A few years ago it was thought that the long hard winters of western Canada would prove a deterrent to colonization of that country by rats but they gradually migrated from the east and spread over southern Manitoba. Now they have reached the Qu'Appelle district of Saskatchewan, and they are known to have burrowed under a straw stack and found sufficient shelter for the winter.

The brown rat is omnivorous in its diet and eats anything edible, vegetable or animal, even leather and fabrics. It attacks poultry, destroying eggs and chickens; fish and fruit are equally acceptable with all kinds of meat, groceries and vegetables; it will eat its own weaker brothers and sisters if pressed for food and has not infrequently attacked helpless human beings. It visits sewers and other filthy places carrying and scattering the germs of disease.

The gopher is pest enough without this latest intruder which in its omnivorous habits and disease-carrying propensities ranks as far more dangerous. The whole of Canada should rise up and wage these pests and evidence is not lacking that the war is on in earnest in some municipalities, where bounties on rat tails have been announced. Individuals should not wait for a bounty, however, but should declare war on the first invasion of their territory and with widespread recognition of the danger and concerted action it ought to be possible for a young and vigorous country in which settlement

is not too dense to win out, even though older and more thickly populated countries, hampered by ancient sanitary systems and less modern living conditions have failed.

### Regaining Place In World Wheat Market

#### Great Increase Shown in Russia's Production and Export

Within five or ten years Russia will be again a major factor in the world wheat market, if the rate of increase in production and export from the U.S.S.R. is maintained. Before the war, Russia was the second largest exporter of wheat. During the past dozen years, of course, comparatively little has been coming out of the country, but recovery has proceeded so far that this spring exports have run as high as 750,000 bushels a week. As Russia has an even larger area of undeveloped wheat land than Canada, production can and will be still further increased; and as labor and land are cheap, the grain can be cheaply produced. "We will have to find some method of reducing production costs," remarks Nor-West Farmer (Winnipeg).

A New Suspender Skirt and Tailored Blouse

Of unusual smartness is the suspender skirt shown here. There is an inverted plait at each side seam to provide for the necessary fullness and the back may be cut high or low. The straps are attached to the back at the shoulders and the lower ends are set under the top of the skirt to form pockets. No. 1598 is in sizes 36, 40 and 44 inches bust. Any size requires 2½ yards 36 or 40-inch material. Price 20 cents the pattern.

The blouse has an applied yoke at the back, a centre front opening, long sleeves gathered to wristbands, a shaped collar and patch pocket. The blouse is No. 1599 and is for Ladies and Misses and is in sizes 16, 18 years, 38, 40 and 42 inches bust. Size 38 requires 2½ yards 39-inch, or 1½ yards 54-inch material. Price 20 cents the pattern.

The designs illustrated in our new Fashion Book are advanced styles for the home dressmaker, and the woman or girl who desires to wear garments dependable for taste, simplicity and economy will find her desires fulfilled in our patterns. Price of the book 10 cents the copy.

### Legume Bacteria

#### Why Legume Inoculation Sometimes Fails to Benefit Crops

Under ordinary field conditions, the presence of the proper strain of legume bacteria in the soil is necessary for the successful growing of alfalfa or other legumes. It is therefore always essential to inoculate when there is any reason to suspect a scarcity in the soil of the bacteria associated with the particular legume being grown. There are times, however, when inoculation fails to benefit a crop. Such failure may be assigned to a number of different causes which are enumerated in a new Experimental Farms pamphlet which may be obtained from the Publications Branch, Department of Agriculture, Ottawa.

In a large number of cases the reason for lack of benefit from inoculation is that the soil has already been inoculated, and the additional bacteria consequently are superfluous. In other instances, where the crop growth is as poor with treated as with untreated seed, adverse climate and soil conditions may be responsible. The proper treatment of the soil is very important and is fully described in the pamphlet. Good drainage and tilting are frequently necessary before a good legume stand can be established as they favor the crop, not only directly, but also indirectly by fostering the nitrogen-gathering bacteria. Inferior seed is a very frequent cause of failure. The use of hardy Canadian-grown seed is essential. In short it should always be remembered that legume bacteria are living things and to do their work properly must be in a suitable environment.

#### Was Somewhat Delayed

A postcard from a friend of boyhood days recently was received by Charles Swift, Brockton, Mass. The sender was inquiring if Swift knew the whereabouts of other schoolboy chums. Surprised, Swift glanced at the postmark, discovered that the card had been mailed March 21, 1883. It had been in the mails 44 years.

Every man hugs the delusion that sooner or later he will invent something that will make him rich.

## Current Activities Indicate That Manitoba Will Soon Become Steady Producer of Gold

### Cattle Imports From Scotland Permitted

#### Department of Agriculture Raises Embargo Under Certain Conditions

The situation in regard to foot and mouth disease in England has so greatly improved that the British Ministry has found it possible to remove its restrictions on the movements of cattle in that country. In view of this, and as Scotland has been absolutely free from the disease for six months, the Department of Agriculture at Ottawa now considers that it will be justified in permitting the importation of cattle, sheep, other ruminants and swine from Scotland under certain conditions.

An order has just been signed, says a statement issued by the department, permitting such importations from Scotland, provided that such animals must be embarked from a Scottish port, and, in addition to the usual health certificates, must be accompanied by an affidavit of the shipper that the animals so embarked have been in Scotland for a period of sixty days immediately preceding the date of embarkation. The animals must also be shipped on a vessel proceeding direct from Scotland to Canada, without touching at an English port, and they must be accompanied by an affidavit from the shipper to the effect that the feed taken on board for feeding these animals en route has been grown and stored in Scotland.

Each importation will be made under permit, issued by the veterinary director-general.

Assistant — "I can't understand what made the lady so angry."

Doctor — "Never refer to a lady's big toe, son. Always say 'the largest of your small toes.'"

If there are no distant relations at a man's funeral it's a safe bet that he died poor.

A. H. A. Robinson, of the department of mines at Ottawa, writes that the next few months may mark the beginning of a new era in the history of mining in Manitoba. He says that for some years production records have credited the province of Manitoba with a nominal output of gold, practically all of it from prospect workings, and under the stimulus of high prices during the war a considerable amount of rich copper ore was mined and shipped; but the province has never attained the status of a metal producer in the ordinary acceptance of that term. Current activities in two widely separated fields, however, now indicate that Manitoba is soon to become a steady producer of gold and, later, possibly an important source of the baser metals, copper and zinc also.

In the northeastern part of the province, east of Lake Winnipeg, are extensive gold-bearing quartz deposits in course of development with very considerable reserves of ore of profitable grade, that is to say, of material that will average about \$12 per ton and having a total estimated gross value of at least \$1,100,000. A 150-ton mill is to be built, the material for this purpose having been taken in over the snow roads last winter. Construction will follow this summer and the mill should be in operation by the end of the year. Hydro-electric power will be used for mining and milling, this being supplied by the Manitoba Power Company from their generating station at Great Falls on the Winnipeg river, about 50 miles away. A high tension transmission line is now being built to the new gold field and it is expected that power will be delivered this spring. The availability of cheap hydro-electric power will be a great boon and will doubtless stimulate development on many properties throughout the district which has heretofore been handicapped by its isolated situation.

In northwestern Manitoba, a 20-ton experimental plant has been built north of The Pas, for the purpose of trying out a method of treatment adapted to the low-grade copper-zinc ores found there. Some 16,000,000 tons of ore carrying an average of 1.68 per cent. copper, 3.49 per cent. zinc, 0.071 oz. per ton gold, and 1.04 oz. per ton silver have been blocked out by diamond drilling, and as soon as a commercially feasible method of treatment has been developed in the pilot plant, the exploitation of this vast deposit will be undertaken on a large scale. It is estimated that the initial expenditure necessary to put the area on a commercially productive footing, including the building of some 85 miles of railway, will be in the neighborhood of \$12,000,000. A number of other deposits very similar in composition have been discovered throughout the district. The owners are only awaiting the outcome of the present experiment to undertake intensive development work on them also.

### Federal Highway Grants

#### Last Fiscal Year in Which Federal Assistance Will be Given

An amount in the neighborhood of \$66,000 payable to the Government of Saskatchewan, has been authorized by order-in-council in connection with Dominion Government contributions to highway improvements.

This is the last fiscal year in which the extended program of federal assistance will continue. The grants will expire at the end of next March and having been extended for five years more than was originally contemplated, the system is not likely to be continued.

It is improbable that in view of this fact, the position of commissioner of highways, vacated by the recent death of Archibald W. Campbell will be filled.

For ten years after its construction in 1835, locomotives were not allowed to enter the Euston railway station in London for fear of frightening horses. The coaches were dragged into the station by a stationary engine.

### Canadian Maples for Canberra

Hon. Ernest Lapointe, Canadian Minister of Justice, now away in Australia, is leaving a lasting result of his visit and of Canada when on July 1st, he will plant at the new Australian capital, Canberra, a maple tree and six maple saplings in commemoration of the Diamond Jubilee of Canadian Confederation.

The maple tree and saplings have already sailed on the crack Canadian-Australian steamship, R.M.S. Niagara from Vancouver and these gifts of the Canadian people to the Australians are entirely products of British Columbia, having been selected by J. Hosie, librarian of the province of Victoria, and Alderman Frank Wood-

side, chairman of the Vancouver Diamond Jubilee celebration committee, in consultation with the department of agriculture for the University of British Columbia.

Great interest in the careful packing and shipment of these trees has been taken by C. A. Cotterell, general superintendent for the British Columbia district of the Canadian Pacific Railway, and H. W. Brodie, assistant passenger traffic manager of the railway at Montreal, while the manager at Vancouver of the Canadian-Australian line, J. C. Irens, in addition to arranging for transportation, has promised that personal attention will be given the trees on board daily.

## Cuticura Heals Irritating Rashes

Don't suffer with rashes, eczemas or irritations when Cuticura Soap and Ointment will quickly relieve and heal. Bathe with Cuticura Soap and hot water, dry and anoint with Cuticura Ointment. Nothing quicker or safer than Cuticura Soap and Ointment for all skin troubles.

Sample Each Free by Mail. Address: Canadian Depot, "Hawthorne, Ltd., Montreal." Price, Soap 25c, Ointment 50c and 100c, Cuticura 50c.

### CHAPTER XXXVI—Continued.

The man to whom Graydon talked went over to the table where Eggleston sat, his head set well down into his shoulders. Other men stood at the table, too, important men they seemed, of the importance that is marked by large achievements. Among them was a noted sculptor. And an artist, and two or three famous architects.

On the massive table, between them and the banker, and where John's blueprint once had been spread by Joanna, a glistening white model stood, the miniature of an imposing structure of great halls and marbled columns reaching upward to a gold dome. Above the dome a figure poised, a slender figure that seemed to impinge some ineffable joyousness. The sculptor, one whose name is far flung, passed his fingers lovingly over the delicate form destined later, to be translated into marble. This part of the model was his handiwork. He was proud of his association with the monumental structure it was to embellish.

Eggleston, who had watched quietly, observed.

"That was her idea. She explained it to me across this table when she brought me the dream her young friend had been bothering her about. She said memorials ought to have life in them, instead of death." The banker chuckled, and the sternness in his eyes softened. "She said the usual kind of memorial always made her mad because they reminded her of so many people who weren't dead that ought to be!"

Foreman, chief of the firm which had sponsored John, broke in.

"So it was she, after all, who conceived the soldier as always stirred to valor by the kiss of a girl—or of a woman who is still a girl to him? Yet you compelled me to get the conception across my desk to young

Wilmore as if it were my own! He fought against it, for a time, but the grandeur of it came to him suddenly. Shall we tell him today?"

"No," Eggleston replied. "It will be sufficient for him to learn, from us, that the money with which he has worked this model out, the funds that promoted his idealistic plan and translated his blue-printed dream into this step toward reality, came from her—that this was how she used the money I gave her but which remained so much a mystery to her."

"It will be quite all right, won't it?" she asked brightly. "If I ask you to share me, with him?"

After a brief pause the banker added, dryly.

"Whatever else there is for him to know I imagine she'll tell him—if she wants to."

Brandon, who was talking with Graydon, turned to meet Eggleston's eyes fixed on him with a quizzical expression in them. Brandon nodded.

"Yes," he observed, "she'll have many things to say to him, I fancy. For his sake, I hope she doesn't say them with a champagne bottle!"

The ancient butler, whose years had flowed with those of his master, entered noiselessly and went up to the table.

"The young lady has arrived, sir," he announced.

There was instant stillness. All in the room looked inquiringly at the banker, who made a sign to Graydon. The butler went out. A moment later Joanna, suddenly startled by the faces turned toward her, was framed in the doorway. Graydon went up to her and took her hand, gently, and led her into the room. He announced to the company, simply:

"This is Joanna."

One by one the important seeming men pressed upon her. Dazed, bewildered, fighting for some inkling of understanding, she heard the murmur of words—words, words! Each man took her limp hand and pressed it and said to her—words! They congratulated her; they spoke earnest compliments; they uttered senseless things she couldn't fathom. And as each one bowed and left her he passed out of the room until, at last, there were only Graydon, Brandon and Eggleston.

At Brandon's lips she saw the old smile, hovering—the old smile, but different. And she saw the same lights in Eggleston's eyes she used to detect in them when they sat across the table together.

"Please!" she pleaded. "What does it all mean?"

Brandon faced her.

"It means," he said, "that things are going to be straightened out. For me, the best it means is that you are to know that both you and I were playing a game—and that, because you won, that night on La Turbie when I had the bandits thrust you back into the club house, nobody is happier than I."

He left the room then, with Graydon, and Joanna faced her banker alone. Eggleston rose and walked around the table to where she stood, still gripped in the spell of her bewilderment.

He led her to the fireplace and, taking her by the shoulders, turned her around so that she faced him. Above her the canvas image of the girl in the gold frame looked down. The banker went back to his chair at the table. For a long time neither spoke. Joanna stood almost motionless, her face deathly white. Eggleston gazed at her and she saw that his eyes wandered from her face to the painting over her head, and then back again. At last, he said:

"Your money, my dear, was from me. It was I who was your mysterious benefactor, and it was I who determined that there should be no conditions attached to your gift. I wanted to know how you, a girl of today, would go; which way you would turn. If left to your own resources."

"It was because of a silly old man's romance—a romance of young days when, people have said, young girls were different. The one in the painting above you was she to whom I made my promise that I would make her happy and rich. She didn't live—even to marry me. So I've lived alone. The fortune came, but all that I've had of her is the memory in the painting there."

"I've a lot of money, my dear; so have all my relatives. I've had the whim, in late years, to leave a great deal of it to someone who can carry on, when I'm done, for the girl up there who has carried on with me. But I've never had confidence in any of you any of your young people of these days. I admit I couldn't understand you. Your friend, and my friend, Graydon, told me I was a fool. He claimed to know you all—because he knew so many of you. In the store. He told me of you, of a Miss Twenty-seven, who, he said, recalled to him the painting over my fireplace. Well—that's about all. We decided to try you out and we have. I thought it would cost me a million dollars. In stead I have profited. It has given me—if you will have it that way—you! I know, now, that you can carry on for her."

There was much more that Eggleston said; many things that quivered on his lips. Shadows and laughter and much of wonder moved in changing procession across the deep brown eyes of the girl who crumpled at his feet. But the things he said were the useless foolish things that people say when they have much to tell each other of themselves alone. When they spoke of anything else it was of the model on the table, and of how the money had been secretly spent at Joanna's request to make fulfillment of the promise of it.

Or of Brandon, and Yvonne.

"In a way of his own planning he only tested you, and it was with my encouragement," the banker said. "He, like me, was skeptical. He professed to know you girls of today. He admits he didn't know you at all. I kept from him the secret of your use of your money. I allowed him to test you to the end."

"That was why, then," Joanna observed, "he threw me into the companionship of Yvonne? I've known there was a reason. I've wondered over it. I think she knew, for I've always realized she was leading me

up to things, showing them to me, and then saving me from them."

He nodded gravely. "Yes," he mused; "I have the impression that one may be profoundly mistaken about many of the world's Yvonne Contants."

Into the silence of the library the old butler intruded.

"Mr. Wilmore has come, sir."

Joanna, with a sudden catch at her breath, rose. For a moment she looked up into the face of the girl in the painting—the girl of yesterday.

"If you wouldn't mind," she said quietly, her face pale again, "I'd like to see him in here—alone!"

At the door Eggleston felt her hand on his arm. He saw that the color had come back into her face and that she was smiling up to him. "It will be quite all right, won't it?" she asked brightly. "If I ask you to share me, with him?"

And that was Joanna, Joanna of the deep brown eyes and the shimmering gold brown hair; Joanna of the skirts too short and the lips too red and the tongue too pert. She is the girl next door, or, at the farthest, just across the street. Nothing more, and nothing less, than the Modern American Girl.

THE END

## BABY'S OWN TABLETS HELP A PRIZE WINNER

Baby's Own Tablets are without an equal for little ones. From the newborn babe to the growing child they are an absolute safeguard to health. Once a mother has used them she will use nothing else. Thousands of mothers always keep them on hand.

Among the mothers who state that Baby's Own Tablets are the best medicine for little ones that they know of is Mrs. Russell Hill, of Norwood, Ont. Her experience with the Tablets should be of great benefit to any mother who has not already given the Tablets a trial. Mrs. Hill says: "I have five fine healthy children, and from the youngest to the oldest they get no other medicine but Baby's Own Tablets. When our baby girl was eleven months old she won second prize at the Norwood Fair, and when she was a year older she won first prize in competition with twenty-eight other babies. It was the Tablets that gave her the health and development to carry off these prizes. I always delight in telling other mothers what the Tablets have done for my children."

Baby's Own Tablets are sold by medicine dealers, or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Honoring the Spirit of the Pioneers

Spirit of Romance and Adventure Should Always Remain

One portion of Lord Willington's speech in reply to the civic address of welcome that met with a warm response in Calgary, was his reference to the pioneers.

"You speak of this city," he said "as having been in the past, one of the frontiers of romance and adventure, and you say that it has happily not yet lost its distinctive features. I trust it never will, for however conditions may change, it is always well that the romance and adventure of the past should remain with you, and that you should always keep in mind those early pioneers who laid the foundations of your great and increasing development."

Calgary appreciates the sentiments uttered by His Excellency. Happily we have many of the pioneers of Alberta with us. This city does not neglect them. It holds them in respect and affection. They still play their important part in all activities that may contribute to the furthering of the welfare of the city. In deed, they look upon the city—as they have the right to—as their child, and their fostering care and interest still surround it.

They have witnessed its growth from birth and through all the anxieties and setbacks of youth to its present maturity and assured position. They can have a special pride in the city that they founded. But the younger citizens now more actively carrying the burden are not disposed to dispense with their advice and their co-operation. The Herald knows of no city in Canada where youth and age more unitedly or more enthusiastically work together for their home city, the latter for the city which they helped to create, the former for the city which they are striving to make the finest possible memorial to the brave spirit of the pioneers who founded and nourished it.—Calgary Herald.

## MAGIC BAKING POWDER

### Little Helps For This Week

If thou draw out thy soul to the hungry, and satisfy the afflicted soul, then shall thy light rise in obscurity, and thy darkness be as the noonday, and the Lord shall guide thee continually.—Isaiah LVIII, 10, 11

Seldom can the heart be lonely.  
Seldom can the heart be lonely.  
Self-forgetting seeking only  
Emphatic cups of love to fill.  
—Frances Ridley Havergal

In shutting none out of our sympathy, in the willingness to help and to be helped by all, we are here beginning like children to climb the foothills that lead to immortality. The self-absorbed, the unsympathetic, the unloving have lost their way, and are on the downward path; no light from the eternal life is reflected from their faces. Lucy Larcom

### Big Land Purchase

The purchase of 1,920 acres of land for about \$60,000 for settlement by a party of Northern Europeans has been put through by the Canada Colonization Association. Situated nine miles east of Yorkton, Saskatchewan, this piece of land will be farmed by five families of twenty-five persons. The settlers are all trained agriculturists and are taking possession at once.

Auto Sabotage — In this car you will feel perfectly at home.

## Firestone Dealers

Demonstrate This  
Extra Value

The Firestone Dealer in your locality will gladly explain to you the extra value of Gum-Dipping. He is prepared to demonstrate how the cords of the carcass are saturated in a rubber solution, insulating every fibre of every cord with rubber, which minimizes friction. Naturally, tires built of Gum-Dipped cords have extra carcass strength and stamina insuring longer wear.

## YOUNG WOMEN SUFFER MOST

These Two Found Relief by  
Taking Lydia E. Pinkham's  
Vegetable Compound

Ayer's Cliff, Quebec. — "I have been teaching for three years, and at the end of the year I always feel tired and have no appetite. I was a very sick child, and I have had many pains in my back until sometimes I was obliged to stop working. A friend recommended Lydia E. Pinkham's Vegetable Compound to me and I heard many women telling how good it was so I thought it would help me. And it did. Now I take six bottles every year and recommend it to others." — DONALDA FANTEUX, Ayer's Cliff, Quebec.

"Unable to Work"  
Canning, Nova Scotia. — "I had irregular periods and great suffering at those times, the pains causing vomiting and fainting. I was teaching school and often for some hours I would be unable to attend to my work. Through an advertisement in the papers I knew of Lydia E. Pinkham's Vegetable Compound, and it has been of great benefit to me, the troubles being completely relieved." — LAURA J. EATON, Canning, King's County, Nova Scotia.

## Skinner's Dress Suit

Do clothes make  
the man? You'll  
think so when you  
see Denny breeze  
through this rol-  
licking comedy of  
a man and a dress  
suit and Honey,  
his wife, who spent  
the raise he didn't  
get and made him  
a million.

## LITTLE ITEMS OF LOCAL INTEREST

H. Willson was in town over the  
week end.

Mrs. C. Smith of Wayne, is visit-  
ing with Bessie Cunningham for a  
few days.

J. Atkinson was a Calgary visi-  
tor on Monday, returning on  
Thursday.

J. Castiglione has purchased a  
Chrysler car from Olive Bros. gar-  
age.

R.C. Barr, J. Halbert and Wm.  
Reid went into Calgary Saturday  
to see the football game.

Geo. Brown arrived in Carbon  
on Thursday and spent a few days  
renewing acquaintances.

Jack Black left last Sunday for  
Revelstoke, where he has taken a  
position in a barber shop.

Upon returning to Carbon I find  
many of my outstanding accounts  
are still unpaid. I have given Mr.  
Greenan instructions to sue for col-  
lection of all outstanding accounts  
after June 25th.

G.L. BROWN

The crops in the district are  
looking about as well as can ever  
be expected for this time of the  
year. The abundant rain this  
spring has brought the growth to  
over six inches already and with  
the warmer weather now approach-  
ing it is expected that the growth  
will double that in the next couple  
of weeks.

Canada's industrial products of  
today, together with a compre-  
hensive demonstration of the pro-  
gress of industry in the Dominion  
since confederation, will be display-  
ed in elaborate styles at an exposi-  
tion which the Produced-in-Canada  
Association, sponsored by the Cana-  
dian Manufacturers' Association,  
will stage in Montreal in August  
next.

This spring about 5,000 men have  
been placed on Alberta farms by  
the Alberta Government Employ-  
ment Service. During the month of  
April and the first ten days of May  
1,003 men have been given employ-  
ment by O. Hanson & Company,  
local employment agents for the  
Canadian Pacific Railway. These  
men have been sent out on section  
work and to extra gangs. Of the  
number mentioned 778 were new ar-  
rivals from continental countries.

According to the latest informa-  
tion given out by the Canadian Pa-  
cific Railway in connection with the  
proposed new Toronto hotel, addi-  
tional land has been purchased  
bringing the frontage on Front  
Street up to nearly 600 feet. It has  
also been stated that the new C.P.R.  
hotel will be 20 stories or more in  
height. The site of the proposed  
structure is directly opposite the  
new Union Station, the land being  
occupied at present by the well-  
known Queens Hotel.

In addition to the Exhibition of  
fowl at the World's Poultry Con-  
gress at Ottawa, there will also be  
a large display of rabbits and  
canaries. Announcement to this  
effect was made at a meeting of  
the Congress Live Bird Committee,  
which has definitely assigned space  
for these added classes at the ex-  
hibition.

Thousands of citizens of Regina  
took advantage of the opportunity  
to inspect the new Canadian Pacific  
Hotel Saskatchewan, opened May  
24 by E. W. Beatty, Chairman and  
President of the Canadian Pacific  
Railway. This eleven story addi-  
tion to the company's chain of  
hotels across the continent is re-  
garded as one of the finest buildings  
in the west.

## Your Loose Leaf Account Forms

**A** BUSINESS, no matter how  
small it may be, cannot afford to  
be without Loose Leaf Account  
Forms. They are the recognized book  
keeping system of today.

We can print your Forms any  
size or shape and have them punched  
to fit your binder.

We can do the work here just as  
well and at the same price that you  
pay in the city.

When in need of Loose Leaf Ac-  
count Forms, see us.
